

INFROMATION

Front-end Developer with 3+ years of experience building large-scale, high-performance web applications using Angular (17+) and ReactJS. Skilled in modern frontend architectures, state management (NgRx, RxJS), and component-based development. Passionate about performance optimization, reusable design systems, and delivering seamless user experiences across devices.

EDUCATION

08/2019 - 08/2024

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY AND EDUCATION | Major: Information Technology

Current GPA: 7.57/10

WORK EXPERIENCE

4/2025 - NOW

INTRATECH | Front-end developer

- Currently developing a lightweight web application using LitElement and Reactjs for international clients, utilizing pure HTML, JavaScript, and CSS, with a focus on handling SVG files.
- Took the lead in building and deploying the project from the ground up.
- Optimized web application performance to reduce response times and enhance user experience.
- Ensured system responsiveness and accessibility, with compatibility across various devices and browsers.
- Built and managed application state using modern technologies such as LitElement, Reactjs and supporting libraries.
- Integrated APIs to streamline front-end and back-end communication for a unified software experience.
- Build web apps with PWA, Electron.
- Experienced with Chrome DevTools and Angular DevTools for debugging and performance profiling.

07/2022 - 4/2025

FPT INFORMATION SYSTEM CORPORATION | Front-end developer (angular 15+)

- Developing a high-performance single-page application using NextJS and Angular15+.
- Building a UI toolkit core based on Ant Design, tailwind and show to Story Book. Optimized dataloading performance, reducing response times and enhancing user experience.
- Participated in web application development using the Scrum methodology, conducting daily Scrum meetings to report progress and address issues.
- Implemented responsive and accessible design, ensuring compatibility across multiple devices and browsers, boosting user engagement.
- Optimized web application performance by integrating advanced JavaScript and TypeScript techniques.
- Used APIs to connect front end and back end, managing requests and responses.
- Developed and maintained code quality through testing and debugging.
- Built and managed application state using NgRx and RxJS, ensuring consistency and performance in web applications.
- Optimized data loading performance, reducing response times and enhancing user experience.
- Config YAML file to create dynamic form UI.
- Enhanced system accessibility and responsiveness.
- Build project using docker.
- Use mongoDB to store data and connect to the system.

SKILL

Communication skills in both verbal and written English

Docker, git

Teamwork

INTEREST

Discover new knowledge

Learn from others

Sports, music

PROJECT

07/18/2022 - PRESENT

E-HIRING | Frontend

- Objective: I develop an online recruitment project for recruitment and interviewing, thereby helping employers shorten the recruitment process, the project has been developed and sold to many parties.
- Designed and implemented scalable component-based UI architecture following Angular best practices. Collaborated in an Agile team, participated in sprint reviews, and ensured UX consistency with Figma designs. Contributed to internal reusable component library for shared UI patterns.
- Techniques and languages: typescript, Angular 14+, html, less.
- Tasks: UI programmer, report writing, database design support.

07/2024 - 10/2024

BUS HÀI PHÒNG | Frontend

- Objective: The product is used for searching bus routes in Hai Phong province, finding and mapping routes, predicting bus arrival times at stations, and other additional features, update Angular version from 11 to 18.
- Techniques and languages: typescript, Angular 15+, html, less, jsonata, library ant design, docker.
- Tasks: UI programmer, report writing, database design support, build project.

07/2023 - 03/2024

ESS | Frontend

- Objective: The project is developed to meet the needs of personnel management and performance evaluation.
- Techniques and languages: typescript, Angular 15+, html, less, jsonata, library ant design.
- Tasks: UI programmer, report writing, database design support.

04/2025 - NOW

SVG-VIEWER | Frontend

- Objective: The project is developed to meet the needs of viewing and interacting with 2D drawings (SVG) in many fields such as construction, shipbuilding...
- Techniques and languages: JavaScript, vanilla JS, HTML, CSS, JSONATA.
- Tasks: project leader, UI programming, report building and performance optimization.

PROFESSIONAL SKILLS

PROGRAMMING LANGUAGE

TYPESCRIPT, JAVA, JAVASCRIPT, LESS, CSS, HTML, JSONATA, SVG FILE.

FRAMEWORK

ANGULAR, REACTJS.

SOFTWARE DEVELOPMENT TOOLS

VISUAL STUDIO CODE, ECLIPSE, VISUAL STUDIO 2019, MONGODB, MICROSOFT SQL.

CERTIFICATE

03/2024 (ISSUED BY ENGLISHSCORE OF BRITISH COUNCIL)

C1 ADVANCED

12/2024

OUTSTANDING EMPLOYEE OF THE YEAR

FUTURE GOALS

My goal is to become a Senior Frontend Developer specializing in scalable architectures and design systems. I aim to leverage my Angular and ReactJS expertise to build high-performance, reusable, and user-centric web applications, while continuously learning and mentoring others in modern frontend technologies.
